

Where Reliability Counts  
**PARKER**  
**SEMI-STEEL**  
**VISES**

Are Invaluable Tools.

The well-known Parker line of Stationary and Swivel, Railway, Sudden Grip, Filers', Wood-workers', Combination Pipe, Interchangeable Jaw Vises, Etc., remains at the same high standard we have always maintained.

In addition we now make the new Reinforced Slide Solid Jaw Stationary or Swivel Vise which is unquestionably superior in strength and durability to any on the market. It is the only Vise made with reinforced sliding jaw.

Whatever you need in Vises there's a "Parker" to do your work, and if it's a "Parker" you'll have none of the troubles with breakage or wear that other Vises cause.

Strength, Quality and Absolute Reliability are found in every Parker Vise.

Send for our large Illustrated Catalog, showing 57 different styles and 165 sizes.
